CONTENTS OF VOLUME 29

NUMBER 1, APRIL 1969

HANNAH J. GOULD, JENNIFER C. PINDER, H. R. MATTHEWS, AND A. H. GORDON. Fractionation of Low Molecular Weight Frag- ments of Ribosomal and Viral RNA by Polyacrylamide Gel Electrophoresis	1
D. DESATY, R. MCGRATH, AND L. C. VINING. Mass Spectrometric Measurement of ^{15}N Enrichment in Nitrogen Obtained by Dumas Combustion	22
BRIAN R. CLARK AND ROBERT T. RUBIN. New Fluorometric Method for the Determination of Cortisol in Serum	31
F. C. KNOWLES, MALCOLM KENDREW PON, AND N. G. PON. Direct Spectrophotometric Measurement of the Ribosephosphate Isomerase Catalyzed Reaction	40
RAMON LIM, JOHN J. HUANG, AND GARY A. DAVIS. Autoradiog- raphy with Acrylamide Gel Slab Electrophoresis	48
RICHARD A. HARVEY. A Simple Stopped-Flow Photometer . . .	58
RAYMOND F. CHEN, ALAN N. SCHECHTER, AND ROBERT L. BERGER. Stopped-Flow Fluorometry with Available Instrumentation .	68
B. LERCH AND H. STEGEMANN. Gel Electrophoresis of Proteins in Borate Buffers: Influence of Some Compounds Complexing with Boric Acid	76
K. K. TUNG AND J. H. NORDIN. Determination of the Action Patterns of Glycanases	84
N. BILIĆ AND J.-P. FELBER. An Improved Fluorometric Method for Measurement of Alloxan in Biological Fluids	91
G. R. LIMB AND A. M. DOLLAR. Quantitative Determination of Cystine and Oxidized Glutathione with Benzenethiol . . .	100
SYDNEY M. FRIEDMAN, VLADIMÍR PALATÝ, AND MIYOSHI NAKASHIMA. Glass Electrodes in Studies of Ion-Exchange Kinetics . . .	107
GEORGE H. ADAMS AND VERNE N. SCHUMAKER. Rapid Molecular Weight Estimates for Low-Density Lipoproteins	117
JAMES V. BENSON, JR., AND JAMES A. PATTERSON. Accelerated Chromatographic Analysis of Selenocystine and Selenomethio- nine	130
WILLIAM W. EUDY, NAOMI J. BERNHEIM, AND WALTER J. DOBROGOSZ. Procedure for Incorporation of Radioisotopically Labeled Metabolites into Embryos of Dipterous Insects	136

A. ZLATKIS AND B. ZAK. Study of a New Cholesterol Reagent . .	143
C. E. MOORE, JR. AND A. L. UNDERWOOD. The Ionization Constant of Nicotinamide-Adenine Dinucleotide	149
I. T. TAKAHASHI AND F. A. BLANCHARD. Liquid Scintillation Counting: Determination of Background Counts of Quenched Samples Using an External Standard Channels Ratio	154

SHORT COMMUNICATIONS

PADMANABHAN P. NAIR AND CONSOLACION GARCIA. A Modified Gas-Liquid Chromatographic Procedure for the Rapid Determination of Bile Acids in Biological Fluids	164
DOROTHY VON REDLICH AND DAVID GLICK. Improvements in Fluorometric Micro Determinations of Histamine and Serotonin	167
DAVID A. NELSON. TLC Detection of Phthalate Esters with Anisaldehyde and Dragendorff Reagents	171

NUMBER 2, MAY 1969

H. T. KEUTMANN AND J. T. POTTS, JR. Imported Recovery of Methionine after Acid Hydrolysis Using Mercaptoethanol . .	175
G. SCHMER AND G. KREIL. Micro Method for Detection of Formyl and Acetyl Groups in Proteins	186
TOSHIO KANEKO AND JAMES B. FIELD. A New Determination of Oxidized and Reduced Nicotinamide-Adenine Dinucleotide in Tissues	193
JOHN LENARD AND PAUL M. GALLOP. Sequence Analysis of Arginyl Peptides by Mass Spectrometry	203
HSIAO MAY WU AND S. ARTHUR CONTI. New Method for the Differentiation of Ribonucleotides from Deoxyribonucleotides .	210
L. W. SMITH. Combustion and Liquid Scintillation Determination of Carbon-14 in Biological Samples	223
THOMAS G. PRETLOW, II, CHARLES W. BOONE, RICHARD I. SHRAGER, AND GEORGE H. WEISS. Rate Zonal Centrifugation in a Ficoll Gradient	230
G. G. VUREK AND R. L. BOWMAN. Fiber-Optic Colorimeter for Submicroliter Samples	238
R. H. HINTON, M. L. E. BURGE, AND G. C. HARTMAN. Sucrose Interference in the Assay of Enzymes and Protein	248
JOHN L. MARTIN AND MARLENE L. GERLACH. Separate Elution by Ion-Exchange Chromatography of Some Biologically Important Selenoamino Acids	257
CALVIN L. LONG AND JOHN W. GEIGER. Automatic Analysis of Amino Acids: Effect of Resin Cross-linking and Operational Variables on Resolution	265

FRANK EISENBERG, JR. AND ARTHUR H. BOLDEN. Gas Chromatography of Sugar Phosphates and Sugar Nucleotides	284
JOHN B. ALLRED AND DAVID G. GUY. Determination of Coenzyme A and Acetyl CoA in Tissue Extracts	293
BARBARA R. TALAMO AND KONRAD BLOCH. A New Assay for Fatty Acid Desaturation	300
RONALD J. VAUGHAN AND F. H. WESTHEIMER. A Titration Method for Bovine Trypsin	305
ADAM SHATKAY. Activity of Phosphate Ions Measured with Phosphate Electrodes of the Second Kind	311
ARNOLD H. SCHEIN AND CHARLES D'ANGELO. Base Analysis of RNA: Implications for RNA Analysis of Effects of Heating Purines and Pyrimidine Nucleotides with 1 N HCl at 100° for One Hour	323
IN-YOUNG LEE AND BRITTON CHANCE. Method for Creating Rapid Cellular Temperature Perturbation	331

SHORT COMMUNICATIONS

TETSUO HIYAMA, MITSUO NISHIMURA, AND BRITTON CHANCE. Determination of Carotenes by Thin-Layer Chromatography	339
ARNOLD S. BLEIWEIS AND SYLVIA E. COLEMAN. Improved Separation of Components of Streptococcal Cell Walls by Thin-Layer Chromatography	343
M. K. JOHNSON. Counting of Cerenkov Radiation from ³² P in Nonaqueous Media	348

NUMBER 3, JUNE 1969

ANDERS BERGSTRAND AND GUSTAV DALLNER. Isolation of Rough and Smooth Microsomes from Rat Liver by Means of a Commercially Available Centrifuge	351
JOHN J. O'NEILL AND T. SAKAMOTO. Fluorometric Micro Determination of Citrate in Tissue Extracts	357
P. E. STANLEY AND S. G. WILLIAMS. Use of the Liquid Scintillation Spectrometer for Determining Adenosine Triphosphate by the Luciferase Enzyme	381
R. W. BIDE. An Automated Method for the Estimation of Total Phosphate in Biological Materials	393
MAX E. ROYER AND HOWARD KO. A Simplified Semiautomated Assay for Plasma Triglycerides	405
E. PERSSON, H. R. ULFENDAHL, B. G. WALLIN, AND B. HELLMAN. Spectrophotometric Determinations on Droplets Shrunk in Oil	417
RONALD D. EDSTROM. A Colorimetric Method for the Determination of Mucopolysaccharides and Other Acidic Polymers	421

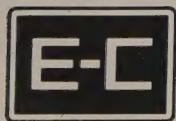

EARL F. WALBORG, JR., DURWOOD B. RAY, AND LENA E. ÖHRBERG.	
Ion-Exchange Chromatography of Saccharides: An Improved System Utilizing Boric Acid/2,3-Butanediol Buffers . . .	433
JUSSI K. HUTTUNEN AND TATU A. MIETTINEN. Quantitative Determination of Urinary Neuraminyol Oligosaccharides by Gas-Liquid Chromatography . . .	441
GEORGE W. RUSHIZKY. Column Chromatography of RNA and Oligonucleotides on Denatured Proteins . . .	459
ATA A. ABDEL-LATIF. Reaction of Catecholamines with Hydroxylamine and Its Application to the Assay of Catechol O-Methyl Transferase . . .	468
HANS-PETER BÄR AND OSCAR HECHTER. Adenyl Cyclase Assay in Fat Cell Ghosts . . .	476
WILLIAM H. SHIPMAN AND LEONARD J. COLE. A Surfactant Bee Venom Fraction: Separation on a Newly Devised Constant Flow Rate Chromatographic Column and Detection by Changes in Effluent Drop Volume . . .	490
H. C. BIRNBOIM. Semiautomatic Fractionation of Dilute Polyacrylamide Gels . . .	498
ARNOLD L. SHAPIRO AND JACOB V. MAIZEL, JR. Molecular Weight Estimation of Polypeptides by SDS-Polyacrylamide Gel Electrophoresis: Further Data Concerning Resolving Power and General Considerations . . .	505
H. BARRERA, K. S. CHIO, AND A. L. TAPPEL. Automation of Enzyme Reactions: Ribonuclease . . .	515
ROGER M. MCKINNEY, FREDERICK C. CHURCHILL, II, JANET T. SPILLANE, AND GEORGE W. PEARCE. Characterization of Fluorescein Isothiocyanate Dyes by Infrared and Thin-Layer Chromatography Methods . . .	526
SHORT COMMUNICATIONS	
BRIAN G. D'AOUST. A Simple Mechanical Linkage for Adding Solutions in Experiments under Elevated Gas Pressure . . .	533
V. H. POTTY. Determination of Proteins in Presence of Phenols and Pectins . . .	535
MICHAEL GRONOW AND PAUL TODD. The Extension to Proteins of Saville's Method for Thiol Estimation . . .	540
NORMAN P. MADSEN. Use of Toluene-Triton X-100 Scintillation Mixture for Counting ¹⁴ C Protein Radioactivity . . .	542
P. D. FULLERTON AND L. R. FINCH. The Use of Polyethyleneimine-Cellulose Thin-Layers in the Assay of Pyrophosphate-ATP Exchange Reactions . . .	544
AUTHOR INDEX . . .	548
SUBJECT INDEX . . .	550

E-C helps you sort things out.

Electrophoresis—Vertical gel electrophoresis systems for analytical and preparative separations. Flat slabs: polyacrylamide, starch, and other gels. ☐ Immuno-electrophoresis. ☐ Pressure plate (paper) electrophoresis. ☐ Cellulose acetate electrophoresis. ☐ Electrophoretic destainer. ☐ Transmission densitometer with electronic integrator.

Countercurrent distribution—Fully automatic countercurrent fractionators with 100, 200, 300, 400 or more cell trains. ☐ Manual 20-tube fractionators for preliminary separation and classroom demonstration.

Column chromatography—Non-specific measurement by refractive index increment. Small hold-up volume, wide range, direct linear response.

For detailed information, call collect. Ask for Technical Service at (215) 382-9100. Or underline the items of interest and mail this ad to us, E-C Apparatus Corporation, 755 St. Marks Street, University City, Philadelphia, Pa. 19104.

GILFORD UV & VIS SPECTROPHOTOMETERS

OVER 300 READINGS PER HOUR . . . with the model 2443 RAPID SAMPLER

The Gilford vacuum operated rapid sampling system requires samples of only 0.5 ml and can process over 300 per hour. The cuvette remains in the measuring beam for both filling and cleaning, minimizing sample handling and cuvette breakage. Construction of chemically inert Kel-F permits the use of a wide variety of reagents.

With this increased productivity available, transcription time becomes a limiting factor. A permanent record of absorbance or concentration can be printed out automatically by adding the Gilford Model 410 Absorbance/Concentration Meter and Model 4006 Data Lister.

UV or VIS . . . STAINED OR UNSTAINED with the model 2410 LINEAR TRANSPORT

Separation of ribosomal RNA by gel electrophoresis has made a powerful technique available. The development of the Gilford Model 2410 Linear Transport permits you to scan such gels in the ultraviolet directly. You get increased accuracy with high resolution. The time consuming staining process is eliminated.

Unstained and stained materials may now be analyzed, as both ultraviolet and visible energy can be used. With the Model 2410 Linear Transport you will be able to handle materials such as polyacrylamide gel cylinders and slabs, cellulose acetate membranes, and photographic emulsions.

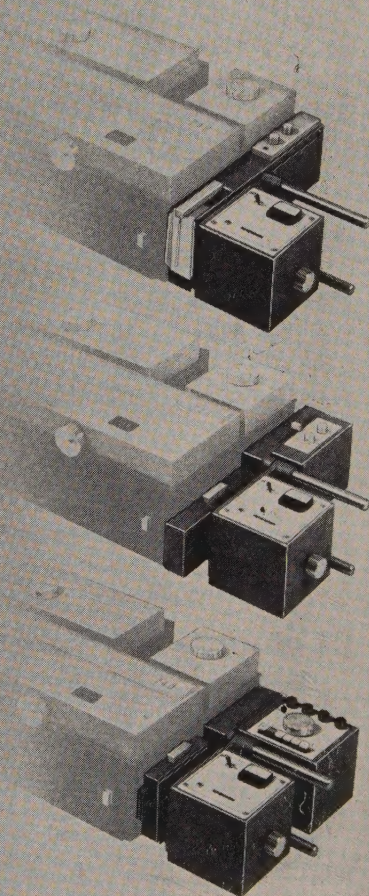

RECORD 4 INDIVIDUAL REACTIONS WITH 12 POINTS PER REACTION EVERY 3 MINUTES . . . with the model 2441 AUTOMATIC POSITIONER

Your spectrophotometer equipped with the Gilford automatic sample handling system will produce more data than before, while maintaining the precise alignment demanded when using micro cuvettes. In the automatic mode up to 16 plot points, four per individual cuvette, can be recorded in one minute. The exclusive offset feature permits individual baseline adjustment for each cuvette position.

. . . . FLEXIBILITY TO MATCH YOUR GROWING NEEDS

All Gilford UV/VIS Spectrophotometers and most quality monochromators are readily adapted to use these accessories. Find out how easily and inexpensively these devices can be adapted to your present system. Call 216/774-1041 now, or write for Bulletin AB-69

Cut your field down to size.

The size of a mini-catalogue. A mini-catalogue of reprints of the world's foremost journals in the field of biology. Journals such as *Human Genetics*, *Journal of Bacteriology*, *Journal of Experimental Biology*, *Biological Abstracts*, and the *Journal of Biological Chemistry*. These reprints—like all Johnson reprints—are identical or similar in format to the originals.

In addition to volume numbers, years, and prices for individual volumes and cloth and paper bound sets, the mini-catalogue contains precis describing the editorial contents and objectives of each journal. For a *free* copy, simply mail the coupon.

-170°F sub-arctic biological storage cabinet.

**The 7.4 cu.-ft.
Relialab Sub-Arctic
biological storage
cabinet offers all this:**

- Fast pulldown from ambient of 80° F to —170° F
- Vapor-sealed stainless steel liner
- Foam sub-lids
- "Hermeticool" fully hermetic, all-welded refrigeration system
- Indicating temperature controller with accuracy of $\pm 1^\circ$ F
- 1-year warranty
- Other models to —150° F and —130° F
- Vial and capsule racks optional

To learn more about the Sub-Arctic storage cabinet,
write or call today.
